DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Specification

The amendment to page 2, paragraph 3 is improper for the following reasons: the amendment to the specification was not done in compliance with 37 CFR .1.21(b)(ii) reproduced below:

(ii) The full text of any replacement paragraph with markings to show all the changes relative to the previous version of the paragraph. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strikethrough except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strikethrough cannot be easily perceived.

Because of the use of double and single brackets within the amendment as presented it is impossible to ascertain exactly what is being added and deleted from the specification. The applicant is requested to resubmit the amendment to page using the guidelines set forth above.

Claim Rejections - 35 USC § 112

Claims 7 to 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 3 of claim 7 the word --to-- should be inserted after "clip" to clarify the function of the clip. In line 6 of claim 7 the term "a slat tab" is considered to be indefinite, since this is not an art recognized term that describes a particular element known to exist within the art. It is suggested that the term be replaced with a phrase that describes the structural element, such as "protrusion received within a socket" or the like. Claim 10 is indefinite since it is unclear if the claim is drawn to an article (a bedsheet retainer system as set forth in the preamble) or a method of use. These are two distinct forms of invention, the claim can only be drawn to one of the two. Because of the uncertain status of this claim it will not be further treated on the merits.

Allowable Subject Matter

Claims 7 to 9, as best understood, would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed. The Notice of Appeal must be accompanied by the required appeal fee of \$250.

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.
